GitHub | Portfolio | LinkedIn

Professional Summary

Dedicated Computer and Data Science student at Alexandria University with extensive hands-on experience in statistical modeling, machine learning, and data visualization. Proficient in Python, R, and SQL, using these tools for effective data analysis and application development. Achieved impactful results through academic and personal projects. Committed to applying technical expertise and analytical skills to address real-world data science challenges and contribute to innovative solutions.

Education

Alexandria University, Alexandria

Bachelor in Computer and Data Science

Expected Graduation: July 2027

Skills

Technical Skills:

Python, R, SQL, Java, Kotlin, Android Development, Game Development, Git

Soft Skills:

Analytical Thinking, Creativity, Problem-solving, Time management, Critical thinking, Computer skills, Calm under pressure

Certifications

- Faculty of Computers and Data Science, Alexandria University, Certification, July 2027
- DEPI - Android Development Certification, January 2026

Languages

- Arabic: Native
- English: B2

Relevant Coursework

- Statistics & Probability: Descriptive statistics, probability theory, hypothesis testing
- Machine Learning: Supervised and unsupervised methods, model evaluation, cross-validation
- Data Analysis & Visualization: Exploratory data analysis, dashboards, storytelling with data
- Database Systems & SQL: Relational design, complex queries, joins, aggregations
- Linear Algebra & Calculus for ML: Vectors, matrices, derivatives applied to ML algorithms
