Professional Summary

I'm a student at Alexandria University's Faculty of Computers and Data Science, skilled in Python, R, SQL, Java, and Kotlin, and passionate about turning data into actionable insights. What sets me apart is my ability to analyze, visualize, and model data to solve real-world problems. I am building end-to-end data science and machine learning projects while expanding my skills in Android app development, giving me a versatile approach to delivering high-quality solutions. I'm eager to collaborate on projects where I can drive results and provide measurable impact.
